

## Member Panel report, 2021:

In 2021, we asked our members what barriers to motoring, road safety, travel and tourism they face. 624 members responded: here's a summary of the findings.

The top environmental barriers were unsuitable weather and distance of journeys (selected by at least 4 in 10). Between 2 in 10 and a quarter identified barriers relating to personal safety, obstacles or trip hardships on the footpath, lack of footpaths and lack of footpath amenities. The top personal barrier was lack of time (selected by 4 in 10). 2 in 10 members identified disability, injury or health problems or having too many items to carry as a barrier.

**The top suggestion for how the government could increase tourism in SA is for better promotion and advertising of our state**

Other prominent suggestions included:

- more travel vouchers/incentives
- improve the roads
- improve public transport/additional train routes
- vaccinate the SA population as quickly as possible.

We'd like to know your thoughts on key issues regarding motoring, road safety, travel and tourism. If you haven't already signed up for RAA's Member Panel, you can do so [here](#).
