Road safety for preschool children Ages 4-5 years

Motor | Home | Travel

DP2010709_03/21/DF

Why Street Smart Preschool?

Because it's never too early to learn the importance of road safety.

RAA recognises that young children can be especially vulnerable on our roads, so it's crucial to equip them with the road skills and knowledge they need to stay safe around traffic.

Street Smart Preschool provides an interactive, age-appropriate road safety program for children with a focus on using the four safety steps, Stop, Look, Listen, Think, when crossing roads and the importance of holding hands with an adult in and around traffic.

Teaching and learning linked to the Early Years Learning Framework for Australia and the Australian National Curriculum (Foundation Year)

Our program has been designed in conjunction with the Early Years Learning Framework and the Australian National Curriculum. Key road safety concepts are explored through a range of fun activities that support learning and development. The resulting knowledge, skills and understanding forms a basis for future learning.

How many sessions can a preschool have?

The visiting Street Smart teacher will negotiate the desired number of sessions to suit your needs. Multiple sessions can be delivered to groups of approximately 20 children. Each session is 30 minutes in duration.

Does the preschool need to provide anything for the session?

No, the Street Smart teacher will bring all the required resources.

How does the preschool arrange a visit?

Planning is site specific and will be determined upon booking. Once a booking is made, your preschool will be contacted by the Street Smart teacher to arrange a time to organise all details for the scheduled visit.
